About my works

In my works, I'm tried to show my inspiration with the combination of traditional material and technical on paper, but I wish I could find a new myself style. About my works, I will not talk too much, because my works will tell you about any thing of themselves. Something always walks thought my dream and I try to catch some impressers. I observed, analyzed and felt a realism figure. Sudden, I caught some things and I drew it on paper, but I always felt myself no satisfaction on my works. Then I try all kinds of materials and technical. I used materials include charcoal, inks, various kinds of paints and other materials. I'm tried to assemble various kind of elements to get ideal results, a perfect combination of the form, the skill and the inspiration.

I wish you would like my works.
